AMS SPONSORED

PLAN CONFERENCE ON AIMS OF L.U.

☐ The Alma Mater Society will sponsor a policy conference to be held at Quetico Centre October 17, 18, 19. The three-day group dynamics session is intended for AMS representatives and officials and other interested members of the university community. The theme will be 'Lakehead University, Where Do We Want To Go and How Do We Get There?'

"I believe that the environment will be particularly conducive to an objective and total approach to our subject and the conference will give us an excellent opportunity to formulate clearer objectives and policies for the future" said Bob Gibson, AMS Vice-President who is heading up the conference.

For further information, write to the AMS Vice-President, c/o Alma Mater Society, Lakehead University.

WILL EXPAND A.P.L. USE

☐ Alan T. McEwan, Director of the Computer Centre and mathematics lecturer D. Watson attended a recent Users' Conference in Birmingham, New York to discuss the new computer language (A.P.L.) which is widely used in the United States. It is used as a teaching aid by physicists, chemists, biologists, psychologists, philosophers, engineers and computer scientists.

The Department of Mathematics pioneered its use at Lakehead University in 1968 and Lakehead became one of the first universities in Canada to use it. Beginning in September, the Department of Mathematics will use A.P.L. extensively in the first year 1a8 course.

Enthusiasm was great for the A.P.L. as a simple mathematical language at the Users' Conference. The excellence of the language makes it easy for anyone to use the computer.

THOSE "LAZY", HAZY DAYS OF SUMMER
