Standardized & Volunteer Patient Programs

We are looking for people to act as medical patients for learning purposes, and for real patients to interact with students and allow them to conduct physical examinations.

Standardized Patients

“Standardized Patients” role play and interact with the student as if they were in a real patient-doctor situation.

The Patient Programs

Standardized & Volunteer Patients can be any age or gender, and must be:

- Reliable
- Punctual
- Enthusiastic
- Cooperative

Patients are required to remember and record details of the session after it is over. This takes energy, memorization and excellent communication skills.

You do not have to be an actor. Training is provided.

Work is casual and based on the medical students' schedules. You will receive payment for training and work sessions.

Volunteer Patients

“Volunteer Patients” are required to discuss their real symptoms with the students as if they were your doctor.

You have a role
to play

The physicians of *tomorrow*
are training at the **Northern
Ontario School of Medicine**

Medical students
will learn patient interview
and examination skills

Northern Ontario School of Medicine

A new medical school for the whole of Northern Ontario, the Northern Ontario School of Medicine is a joint venture of Lakehead and Laurentian Universities. With main campuses in Thunder Bay and Sudbury, it will have multiple teaching and research sites distributed across Northern Ontario, including large and small communities. The School will contribute to improving the health of people in Northern Ontario.
